- Bsc Honors In Information Technology. (Computer software engineering) 2024  
Zimbabwe Open University.  
Pending
- CCNA 2022

## Skills

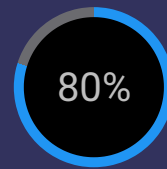

Git

Docker

SQL

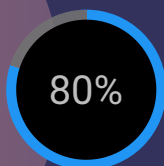

NoSql

Postgres

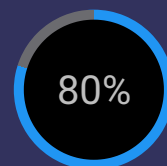

TypeOrm, Sequelize and spring data JPA.

Figma

Trello

Jira

## Experience

- Software engineer intern: 25/09/22 - Present  
launchWith  
I'm currently working as a software engineer intern (Remote) at launchWith, a startup company based in Utah USA. My duties mainly are to develop APIs and web server (backend) logic using node.js(nest). However, I'm more of a full stack engineer as I can switch between frontend and backend.
- Freelance software developer 2018 - Present  
Upwork  
Building client's projects both backend and frontend as a part time freelancer.

## Projects

- E-commerce web application  
A complete dynamic MERN stack web application with NoSql database as storage, admin panel and paypal payment gateway. I built the API and web server using node.js(express) and the UI using react.js.
- launchWith  
Currently building this product as a remote software engineer intern. We are using nest.js (a node.js based framework) to build the rest API and web server. In the frontend, we are using React.js library for UI pages.
- Tinder clone dating app  
I built a tinder clone web application using the MERN stack technology. For the RESTapi I used node.js (express) and react.js for the UI.
- Travel weather application  
I built a weather forecast application to help travellers and tourists to be aware of the weather conditions of their destinations before travelling.
